

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Fourth Plymouth Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Fourth Plymouth Representative District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; less than one percent (412) of these admissions reside in the Fourth Plymouth Representative District. 3% (11) of admissions from the Fourth Plymouth Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Fourth Plymouth Representative District reported the following characteristics:

- 68% were male and 32% were female.
- 54% were between the ages of 30-49.
- 93% were white non-Latino, 2% were black non-Latino, 2% were Latino, and 2% were other racial categories.
- 59% were never married, 19% were married, and 22% reported not to be married now.
- 20% had less than high school education, 46% completed high school, and 35% had more than high school education.
- 44% were employed.
- 9% were homeless.
- 32% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Fourth Plymouth Representative District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	62%	18%	7%	4%	1%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2							
Annual Admissions by Substance Used: FY 1995 – FY 2002							
Fourth Plymouth Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	267	234	74	57	28	31	22
FY '96	238	216	64	37	18	24	13
FY '97	301	266	103	64	31	42	24
FY '98	370	327	96	70	35	54	40
FY '99	315	281	78	61	19	46	35
FY '00	375	319	90	82	51	55	46
FY '01	400	333	98	82	45	75	54
FY '02	412	321	101	75	27	91	72
